

BOTOX®/ Dysport® Post Treatment Instructions

1. Do NOT rub or massage the treated areas for 4 hours after your treatment. Do NOT do Yoga or any type of strenuous exercise for 4 hours after treatment. Also avoid facials or saunas for 4 hours after your treatment. This will minimize the risk of raising your blood pressure and therefore minimize the risk of temporary bruising. Feel free to shower and go about most other regular daily activities.
2. Do NOT lie down for 4 hours after treatment. This is to avoid the risk of pressure on the treated areas (from your pillow) and to avoid the risk of having the area rubbed accidentally.
3. Avoid taking Advil, Vitamin E etc. same day of treatment in order to reduce the risk of bruising.
4. Be assured that any tiny bumps or marks will go away within a few hours. If you need to apply make-up within 4 hours after your treatment, only use a GENTLE touch to avoid rubbing the treated area.
5. Try to exercise your treated muscles for 1-2 hours after treatment (e.g. practice frowning, raising your eyebrows or squinting). This helps to work BOTOX®/Dysport® into your muscles. Although this is thought to help, it will NOT impact your treatment negatively if you forget to do this.
6. Results of your treatment may take up to 10 -14 days to take full effect. Please wait until the 14 days has passed before assessing if you are pleased with the result.
7. Because BOTOX®/Dysport® requires a special technique in order to customize the injections to your individual muscular structure, it is important that your muscle activity recovers BUT that your skin is not creasing to the point from where you started. (?)
8. BOTOX®/Dysport® is a temporary procedure and at first, you may find that your treatment results will last approximately 2-4 months. If you maintain your treatment appointments with the frequency recommended, the duration of each treatment result may last longer than 4 months.
